Outcomes by provider

We publish the final outcomes reported by providers of employment assistance for young participants still at school and school leavers. The publication of these results highlights the intention of the funding in participant NDIS plans and helps participants to consider performance when selecting a provider.

Participants can use this information in discussions with providers about what they offer, how they tailor supports to help participants achieve their employment goals and how their results compare to those in the published report.

Lists of 'Outcomes by provider' will be released on a 6 monthly basis showing the final outcomes for participants assisted by individual providers over the preceding 12 months.
