Regional summaries

- Bayside Peninsula has the highest number of active participants (12,616), while Mallee has the lowest (1,699).
- Inner East Melbourne has the highest average annualised committed supports. This is partially driven by a high proportion of SIL participants compared with other VIC regions.
- North East Melbourne has the highest utilisation at 74%, whilst Outer Gippsland has the lowest utilisation at 56%.
- Only utilisation of committed supports from 1 October 2019 to 31 March 2020 is shown, as experience in the most recent 3 months is still emerging.

Participant Outcomes and Satisfaction

^{*} Outcomes measures represent the weighted average for participants aged 15 and over, and compare the responses at the participants' second plan review, with the result at scheme entry (Baseline). These results only include participants who had their first plan approved between 1 July 2017 and 30 June 2018 and have had a second plan review to date.

^{* &#}x27;Other' include participants with regional information missing.

^{**} Participant satisfaction results for 2019-20 Q3 have been restated using data as at 30 June 2020 due to retrospective changes in the underlying data. These changes mainly arise from lags in data collection.
