<sup>1</sup> Active providers refer to those who have received payment for supporting Agency-managed participants.

<sup>2</sup> The 'benchmark' in this analysis is the national average after adjusting for the proportion of participants in supported independent living in each service district and the length of time participants have been in the Scheme.

<sup>3</sup> Socioeconomic status uses deciles from the ABS Index of Education and Occupation (IEO). A higher decile indicates that people residing in that area have a higher level of skills and qualifications on average. The socioeconomic equity metric is equal to the average annualised plan budget of participants residing in the top two IEO deciles divided by the average annualised plan budget of participants residing in the bottom two IEO deciles (Non-SIL participants aged 0 to 64).
