• The NDIA commenced measuring performance against the PSG metrics prior to the legislation of the Participant Service Charter and Guarantee. On 30 March 2022, the NDIS Amendment (Participant Service Guarantee and Other Measures) Bill 2021 passed in both houses of Parliament, and received Royal Assent on 1 April 2022.

¹ PSG results in the previous quarter may be restated due to ongoing logic refinement and changes in data quality.

² ECEI was previously known as Early Childhood Early Intervention. It is now known as Early Childhood Approach (ECA).

³ The NDIA's new participant check-in process ensures that every scheduled review begins with a contact from the planner or partner to discuss review options well before any scheduled review date. Plans are extended automatically if they have not been reviewed before expiry so participants have continuity of support.

Provider and market metrics

Inflation at plan review (current quarter % per annum)	-0.6%	-1.8%
Inflation within a plan, between reviews (current quarter % per annum)	6.5%	6.4%
Socioeconomic equity (%) ⁴	108%	111%

- Total annualised plan budgets at 31 March 2022 were \$2,905m and payments from 1 July 2021 were \$1,729m.
- The number of active providers at the end of March is 2,555, growing by 5% in the quarter.
- Utilisation was 75% from 1 July 2021 to 31 December 2021, with 17% (2 out of 12) of service districts in South Australia more than 10 percentage points below the adjusted national benchmark.
- In 25% (3 out of 12) of service districts, the top 10 providers provide more than 85% of payments.

Distribution of service districts by plan utilisation ²

Distribution of service districts by market concentration

Service districts more than 10% below plan utilisation benchmark:

- Far North (SA): 56% vs 72% benchmark
- Eyre and Western: 60% vs 72% benchmark

Service districts closest to market concentration benchmark:

- Eyre and Western: 86% vs 85% benchmark
- Limestone Coast: 86% vs 85% benchmark
- Far North (SA): 86% vs 85% benchmark

¹ Active providers refer to those who have received payment for supporting Agency-managed participants.

² The 'benchmark' in this analysis is the national average after adjusting for the proportion of participants in supported independent living in each service district and the length of time participants have been in the Scheme.

³ Total plan inflation consists of plan budget changes occurring at plan review, as well as changes occurring within a plan, between reviews. Previously the NDIA has not included the additional percentage changes in plan budgets that occur within a plan and before the scheduled review, when reporting this metric, and this has underestimated the extent to which plans have increased.

⁴ Socioeconomic status uses deciles from the ABS Index of Education and Occupation (IEO). A higher decile indicates that people residing in that area have a higher level of skills and qualifications on average. The socioeconomic equity metric is equal to the average annualised plan budget of participants residing in the top two IEO deciles divided by the average annualised plan budget of participants residing in the bottom two IEO deciles (participants not in SIL and aged 0 to 64).
