

COAG Disability Reform Council. This is the Quarterly Performance Report for Northern Territory.

This is the June 2018 update on NDIA performance.

Overview

Page: 2

This report is the eighth quarterly report during the NDIS Transition period, which commenced on 1 July 2016.

A diagram displays the six key parts which will be discussed in the Performance Report. These areas are:

- Participants and Planning,
- Committed Supports and Payments,
- Providers and Markets,
- Information, Linkages and Capacity Building,
- Mainstream Interface; and
- Financial Sustainability.

Summary

Page: 3

The following are the key statistics discussed in this report:

Participants and Planning

114 additional participants with plans this quarter.

As at 30 June 2018, plans approved represent:

- 42% of year to date bilateral estimate met (1 July 2017 to 30 June 2018)
- 52% of scheme to date bilateral estimate met (1 July 2014 to 30 June 2018)

Committed Supports and Payments

\$67.3 million has been paid to providers and participants:

- \$1.6m in 2014-15,
- \$4.1m in 2015-16,
- \$10.9m in 2016-17,
- \$50.8m in 2017-18.

Overall,

- 84% of committed supports were utilised in 2014-15,
- 72% in 2015-16,

- 55% in 2016-17,
- 52% in 2017-18.

2017-18 experience is still emerging.

Lower utilisation in 2016-17 is predominantly driven by the large number of participants who received their first plan in this year. Participants utilise less of their first plan compared with their second and subsequent plans, as it takes time to familiarise with the NDIS and decide which supports to use.

Providers and Markets

602 approved providers, a 19% increase for the quarter.

17% of service providers are individual/sole traders.

Mainstream Interface

93% of active participants with a plan approved in 2017-18 Q4 access mainstream services.

PART 1: Participants and Planning

Page: 4

As the transition phase to full scheme continues, the NDIS in Northern Territory continues to grow with 114 additional participants with approved plans this quarter.

Summary

Page: 5

The NDIS is transitioning to full-scheme according to phasing schedules bilaterally agreed by State/Territory and Commonwealth governments.

The following are the key statistics on Participants and Planning:

474 access decisions in 2017-18 Q4 (including both access met and access not met)

114 initial plans approved in 2017-18 Q4

42% of year to date bilateral estimate met (1 July 2017 to 30 June 2018)

47% of transition to date bilateral estimate met (1 July 2016 to 30 June 2018)

52% of scheme to date bilateral estimate met (1 July 2014 to 30 June 2018)

Quarterly Intake

Page: 6

There are three charts. The first chart displays the number of participants with access met (Eligible) by Participant Entry point. The second chart displays the number of participants with approved plans by Participant Entry Point. The third chart displays the number of participants with approved plans by Participant Pathway Type.

2017-18 Q4

Of the 409 participants deemed 'eligible' this quarter 73% entered from an existing State/Territory program.

Of the 114 plan approvals this quarter, 53% had transitioned from an existing State/Territory program and 85% entered with a permanent disability.

The diagram displays the following key statistics on quarterly intake:

474 access decisions

409 access met

114 plan approvals

Quarterly Intake Detail

Page: 7

A chart displays the change in plan approvals between the current and previous quarter.

Plan approvals as at 30 June 2018

Plan approval numbers have increased from 729 at the end of 2017-18 Q3 to 843 by the end of 2017-18 Q4, an increase of 114 approvals.

As at 30 June 2018 there were 25 exits bringing the overall number to 818.

In the quarter of 2017-18 Q4 there were 273 plan reviews. This figure relates to all participants who have entered the scheme.

Cumulative Position

Page: 8

There are two charts. The first chart displays the comparison between the cumulative plan approvals and the bilateral estimate per quarter. The second chart displays the number of plan approvals by participant referral pathway.

Plan approvals as at 30 June 2018

As at the end of 2017-18 Q4, the cumulative total number of participants receiving support was 843. Of these, 571 transitioned from an existing State/Territory program and 39 transitioned from an existing Commonwealth program.

Overall, since 1 July 2014, there have been 1,580 people with access decisions.

Cumulative position reporting is inclusive of trial participants for the reported period and represents participants who have or have had an approved plan.

The following are the key statistics on the cumulative position:

42% of year to date bilateral estimate met (1 July 2017 to 30 June 2018)

47% of transition to date bilateral estimate met (1 July 2016 to 30 June 2018)

52% of scheme to date bilateral estimate met (1 July 2014 to 30 June 2018)

843 plan approvals to date

Participant Profiles by Age Group

Page: 9

There are two charts. The first chart displays the number of participants with an approved plan by age group for the current quarter. The second chart displays the percentage of participants with an approved plan by the participant's age group. This chart compares the current quarter against all prior quarters.

Demographic profile of active participants with a plan approved in 2017-18 Q4, compared with plan approvals as at 31 March 2018, by age group.

Around 21% of participants entering in this quarter are aged 25 to 34 years. This is higher compared to 14% in prior quarters.

Note: The age eligibility requirements for the NDIS are based on the age as at the access request date. Participants with their initial plan approved aged 65+ have turned 65 since their access request was received.

Participant Profiles by Disability Group

Page: 10

There are two charts. The first chart displays the number of participants with an approved plan by disability group for the current quarter. The second chart displays the percentage of participants with an approved plan by the participant's disability group. This chart compares the current quarter against all prior quarters.

Demographic profile of active participants with a plan approved in 2017-18 Q4, compared with plan approvals as at 31 March 2018, by disability group.

20% of participants entering in the quarter of 2017-18 Q4 have a primary disability group of Intellectual Disability.

Note 1: Of the 23 active participants identified as having an intellectual disability, 3 (13%), have Down syndrome.

Note 2: Since 2017-18 Q1 Developmental Delay and Global Developmental Delay have been reported separately to the Intellectual Disability group.

Participant Profiles by Level of Function

Page 11

A chart displays the percentage of participants with an approved plan by the participant's level of function. This chart compares the current quarter against all prior quarters.

Demographic profile of active participants with a plan approved in 2017-18 Q4, compared with plan approvals as at 31 March 2018, by level of function.

For participants with a plan approval in the current quarter:

- 23% of active participants had a relatively high level of function
- 48% of active participants had a relatively moderate level of function
- 29% had a relatively low level of function

These relativities are within the NDIS participant population, and not comparable to the general population.

Participant Profiles by Gender

Page: 12

The figure on the right displays the amount and percentage of participants with an approved plan per the participant's gender group. This figure compares the current quarter against all prior quarters.

Demographic profile of active participants with a plan approved in 2017-18 Q4, compared with plan approvals as at 31 March 2018, by gender.

The majority of participants are males.

Participant Profiles

Page: 13

There are three charts. The first chart displays the percentage of participants with an approved plan by the participant's Aboriginal & Torres-Strait Islander status. The second chart displays the percentage of participants with an approved plan by the participant's Young people in residential aged care status. The third chart displays the percentage of participants with an approved plan by the participant's Culturally and Linguistically Diverse status. All three charts compare the current quarter against all prior quarters.

Demographic profile of active participants with a plan approved in 2017-18 Q4, compared with plan approvals as at 31 March 2018.

Of the participants with a plan approved in 2017-18 Q4:

- 73.7% were Aboriginal or Torres Strait Islander, compared with 78.1% for prior periods.
- 1.8% were young people in residential aged care, compared with 1.0% for prior periods.
- 40.4% were culturally and linguistically diverse, compared with 37.5% for prior periods.

The following are the key statistics for the current quarter on Aboriginal & Torres-Strait Islander status.

84 Aboriginal and Torres Strait Islander

29 Not Aboriginal and Torres Strait Islander

1 Not Stated

The following are the key statistics for the current quarter on Young people in residential aged care status.

2 Young people in residential aged care

112 Young people not in residential aged care

The following are the key statistics for the current quarter on Culturally and Linguistically Diverse status.

46 Culturally and linguistically diverse

68 Not culturally and linguistically diverse

0 Not stated

Plan Management Support Co-ordination

Page: 14

Two charts display the proportion of support coordination and plan management for participants. These charts compare the current quarter against all prior quarters.

The proportion of participants who are fully or partly self-managing their plan was lower in 2017-18 Q4 (4%) compared with prior quarters of transition (5%). The proportion of participants whose plan was partly agency managed and partly plan managed was lower in 2017-18 Q4 (16%) compared with prior quarters of transition (24%).

99% of participants who have had a plan approved in 2017-18 Q4 have support coordination in their plan, compared with 96% in prior quarters during transition.

Plan Activation

Page: 15

Two charts display the proportion of the duration to activate plans. These charts compare plans approved in 2017-18 Q1, against plans approved in prior quarters.

Plan activation refers to the amount of time between plan approval and the commencement of the participant receiving support.

The percentage of plans activated within 90 days of approval were:

- 63% of plans approved in prior quarters
- 70% of plans approved in 2017-18 Q2.

Plan activation can only be approximated using data on payments. As there is a lag between when support is provided and payments made, these statistics are likely to be conservative. That is, it is likely that plan activation is faster than presented. Further, in-kind supports have been excluded from the calculation, which further contributes to the conservative figures.

Note: Given that plans approved after the end of 2017-18 Q2 are relatively new, it is too early to examine the duration to plan activation for these plans and hence these have been excluded from the charts.

Participant Outcomes

Page: 16

A chart displays selected key baseline indicators for participants.

Baseline outcome measures were collected from 98% of participants receiving their initial plan since 1 July 2016.

- 62% of participants aged 0 to before school are able to make friends outside of family/carers, compared to 65% of participants from school age to 14
- 77% of participants aged 0 to before school are engaged in age appropriate community, cultural or religious activities, compared to 32% - 56% for other age groups

- 52% of participants from school age to 14 attend school in a mainstream class, compared to 20% of participants aged 15 to 24
- 10% of participants aged 25 and over have a paid job, compared to 9% of participants aged 15 to 24
- 35% of participants aged 25 and over choose what they do every day, compared to 24% of participants aged 15 to 24

Family/Carers Outcomes

Page: 17

A chart displays selected key baseline indicators for family and carers of participants.

The percentage of participants' family/carers:

- working in a paid job was highest for participants aged 0 to 14 (35%)
- able to advocate for their child/family member was highest for participants aged 0 to 14 (46%)
- who have friends and family they can see as often as they like was highest for participants aged 15 to 24 (57%)
- who feel in control selecting services was highest for participants aged 25 and over (16%)
- who support/plan for their family member through life stage transitions was highest for participants aged 0 to 14 (63%)

Has the NDIS helped?

Page: 18

There is insufficient data to present information on responses to the 'Has the NDIS helped?' questions in NT.

Participant Satisfaction

Page: 19

There is insufficient data to present information on participant satisfaction in NT.

PART 2: Committed Supports and Payments

Page: 20

Both committed and paid supports to participants are increasing in line with the growing scheme.

Overall, \$1.6m has been paid to providers and participants for supports provided in 2014-15, \$4.1m in 2015-16, \$10.9m in 2016-17 and \$50.8m in 2017-18.

Summary

Page: 21

This section presents information on the amount committed in plans and payments to service providers and participants.

The following are the key statistics on Committed Supports and Payments:

\$27.2 million of committed supports in respect of prior financial years including trial

\$98.4 million of supports in respect of 2017-18

\$71.3 million of supports in respect of later years

\$1.6M has been paid to providers and participants for supports provided in 2014-15, \$4.1M in 2015-16, \$10.9M in 2016-17 and \$50.8M in 2017-18.

Overall, 84% of committed supports were utilised in 2014-15, 72% in 2015-16, 55% in 2016-17 and 52% in 2017-18.

The 2017-18 experience is still emerging.

Note: The \$71.3 million committed in future years is due to current plans in place that have an end date past 30 June 2018.

Committed Supports and Payments

Page: 22

A table and a graph show the comparison between the total committed supports and paid support for each year since scheme inception.

Committed amount by year that the support is expected to be provided, compared with committed supports that have been used (paid).

Of the \$197.0 million that has been committed in participant plans, \$67.3 million has been paid to date.

In particular, for supports provided in:

2014-15: \$1.6m has been paid

2015-16: \$4.1m has been paid

2016-17: \$10.9m has been paid

2017-18: \$50.8m has been paid

Committed Supports by Cost Band

Page: 23

Two charts (including and excluding SSA) show the comparison of the distribution of average annualised committed supports by cost band for the current and previous quarter.

As at 2017-18 Q4 the largest proportion of initial plan approvals have average annualised committed supports between \$30,001 and \$100,000.

When participants with shared supported accommodation (SSA) supports are included there is a significant proportion of plans with average annualised committed supports of \$250,001+.

Committed Supports by Age Band

Page: 24

A graph shows the comparison between the average annualised committed supports by age band for the current and previous quarter.

The average annualised committed supports increase steeply to age 19 and then decrease steadily at older ages.

The average annualised committed supports as at 2017-18 Q4 have decreased since the previous quarter for most age groups.

Note: Average annualised committed supports are not shown if there are insufficient data in the group

Committed Supports by Disability Group

Page: 25

A graph shows the comparison between the average annualised committed supports by primary disability group for the current and previous quarter.

Participants with Cerebral Palsy, Multiple Sclerosis and Acquired Brain Injury have the highest average annualised committed supports.

The average annualised committed supports as at 2017-18 Q4 have decreased since the previous quarter for most disability groups that have sufficient data to report.

Note: Average annualised committed supports are not shown if there are insufficient data in the group.

Committed Supports by Level of Function

Page: 26

A graph shows the comparison between the average annualised committed supports by level of function for the current and previous quarter.

The average annualised committed supports generally increase for participants with lower levels of function.

The average annualised committed supports for initial plan approvals as at 2017-18 Q4 have decreased since the previous quarter for participants across low, medium and high levels of function.

Note 1: Average annualised committed supports are not shown if there are insufficient data in the group.

Note 2: High, medium and low function is relative within the NDIS population and not comparable to the general population.

Utilisation of Committed Supports

Page: 27

A graph shows the comparison between the utilisation of committed supports by the year that the support was expected to be provided.

Utilisation of committed supports by year that the support was expected to be provided as at 31 March 2018, compared with 30 June 2018.

As there is a lag between when support is provided and when it is paid, the utilisation in 2017-18 will increase.

Lower utilisation in 2016-17 is predominantly driven by the large number of participants who received their first plan in this year. Participants utilise less of their first plan compared with their

second and subsequent plans, as it takes time to familiarise with the NDIS and decide which supports to use.

The utilisation of committed supports in 2017-18 is still emerging and the utilisation rate is expected to increase as there is a lag between when support is provided and when it is paid.

PART 3: Providers and Markets

Page: 28

The scale and extent of the market continues to grow, with a 19% increase in the number of providers during the quarter to 602.

Summary

Page: 29

This section contains information on registered service providers and the market, with key provider and market indicators presented.

Provider registration

- To provide supports to NDIS participants, a service provider is required to register and be approved by the NDIA.
- Providers register with the NDIA by submitting a registration request, indicating the types of support (registration groups) they are accredited to provide.

How providers interact with participants

- NDIS participants have the flexibility to choose the providers who support them.
- Providers are paid for disability supports and services provided to the participants.

The following are the key statistics:

602 approved providers

17% of service providers are individual/sole traders

Innovative community participation has the highest number of approved service providers, followed by communication and information equipment and assistance products for personal care and safety

Providers over time

Page: 30

A chart displays the cumulative number of approved service providers since June 2016 by the type of provider, individual/sole trader or company/organization.

As at 30 June 2018, there were 602 registered service providers of which 101 were individual/sole trader operated business while the remaining 501 providers were registered as a company or organisation.

17% of approved service providers are individual/sole traders.

The number of approved service providers increased by 19% from 508 to 602 in the quarter.

1.87 average number of new providers per participant

Proportion of Active Providers

Page: 31

The figure displays the proportion of active and not yet active providers.

Change in the activity status of providers.

As at 30 June 2018, 14% of providers have been active and 86% were yet to have evidence of activity. Of the overall stock of providers, 37 providers began delivering new supports in the quarter.

Note: The proportion of active providers in NT is relatively low due to a high proportion (52%) of providers that are approved nationally but not specifically in NT.

Approved Registration groups

Page: 32

A chart displays the approved providers by the changes in registration group and percentage over the quarter.

The number of approved providers has increased for most registration groups over the quarter.

Innovative Community Participation has the highest number of approved service providers and has seen a 46% increase since the previous quarter.

The largest percentage increase in approved providers was for the Specialised Disability Accommodation registration group in the quarter. This was followed by Innovative Community Participation, Vision Equipment and Accommodation / Tenancy Assistance.

Active Registration groups

Page: 33

A chart displays the active providers by the changes in registration group and percentage over the quarter.

The number of active providers in each registration group has increased for some registration groups over the quarter.

Assistance in coordinating or managing life stages, transitions and supports has the highest number of active service providers and has seen a 12% increase since the previous quarter.

The largest percentage increase in active providers in the quarter was for the Early Intervention supports for early childhood registration group. This was followed by Assistance products for personal care and safety, Group and Centre Based Activities and Daily Personal Activities.

Note: Previously, providers were counted as active in a registration group if they were approved in the registration group in NT and active in any group. This has been refined in this report to only count those providers which are active in NT in the registration group considered.

Market share of top providers

Page: 34

There is insufficient data to present information around market share of the largest providers in the NT.

PART 4: Information, Linkages and Capacity Building

Page: 35

Information, Linkages and Capacity Building was covered in the national version of the COAG Quarterly Performance Report

PART 5: Mainstream Interface

Page: 36

The proportion of participants entering in the current quarter accessing mainstream services is slightly lower compared to prior quarters.

Mainstream Interface

Page: 37

An object displays the comparison of the percentage of participants accessing mainstream supports. The object compares the current quarter against all prior quarters (transition only).

93% of active participants with a plan approved in 2017-18 Q4 access mainstream services, a slight decrease from prior quarters. Participants are accessing mainstream services predominantly for health and wellbeing, daily activities and lifelong learning.

The following are the key statistics:

95% of active participants with a plan approved in prior quarters (transition only) access mainstream supports, across the following domains:

- Health and wellbeing (46%)
- Daily activities (13%)
- Lifelong learning (8%)

93% of active participants with a plan approved in 2017-18 Q4 access mainstream supports, across the following domains:

- Health and wellbeing (60%)
- Daily activities (17%)
- Lifelong learning (4%)

PART 6: Financial Sustainability

Page: 38

Financial Sustainability was covered in the national version of the COAG Quarterly Performance Report.
