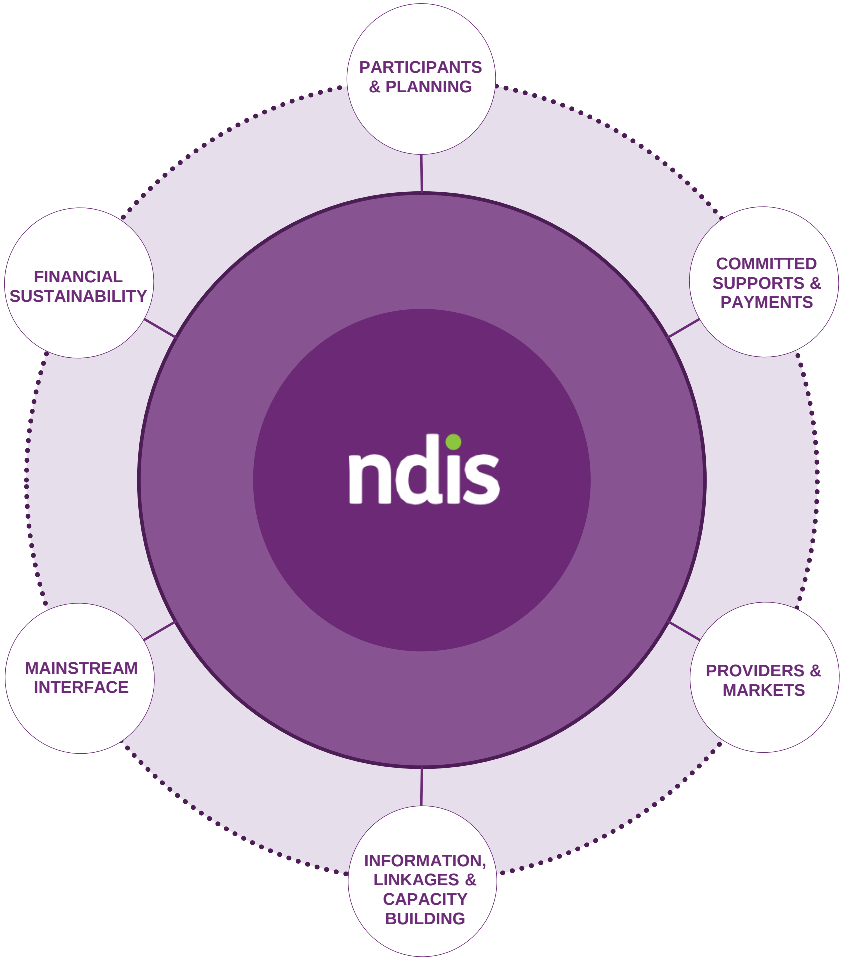
ndis

Overview

This report is the eighth quarterly report during the NDIS Transition period, which commenced on 1 July 2016.



Summary

Participants and Planning

1,912 additional participants with plans this quarter.

As at 30 June 2018, plans approved and ECEI referrals represent:
- 59% of year to date bilateral estimate met (1 July 2017 - 30 June 2018)

Satisfaction rating has improved from 86% in the previous quarter to 89% of participants surveyed this quarter rating their satisfaction with the Agency's planning process as good or very good. This reflects the positive impact of the participant pathway reform on participant experience. As new pathway improvements continue to roll-out, and participants engage with the Scheme for longer, positive outcomes across all domains are expected to grow.

$567.9 million has been paid to providers and participants:
- $0.3m in 2015-16,
- $110.5m in 2016-17,
- $456.8m in 2017-18.

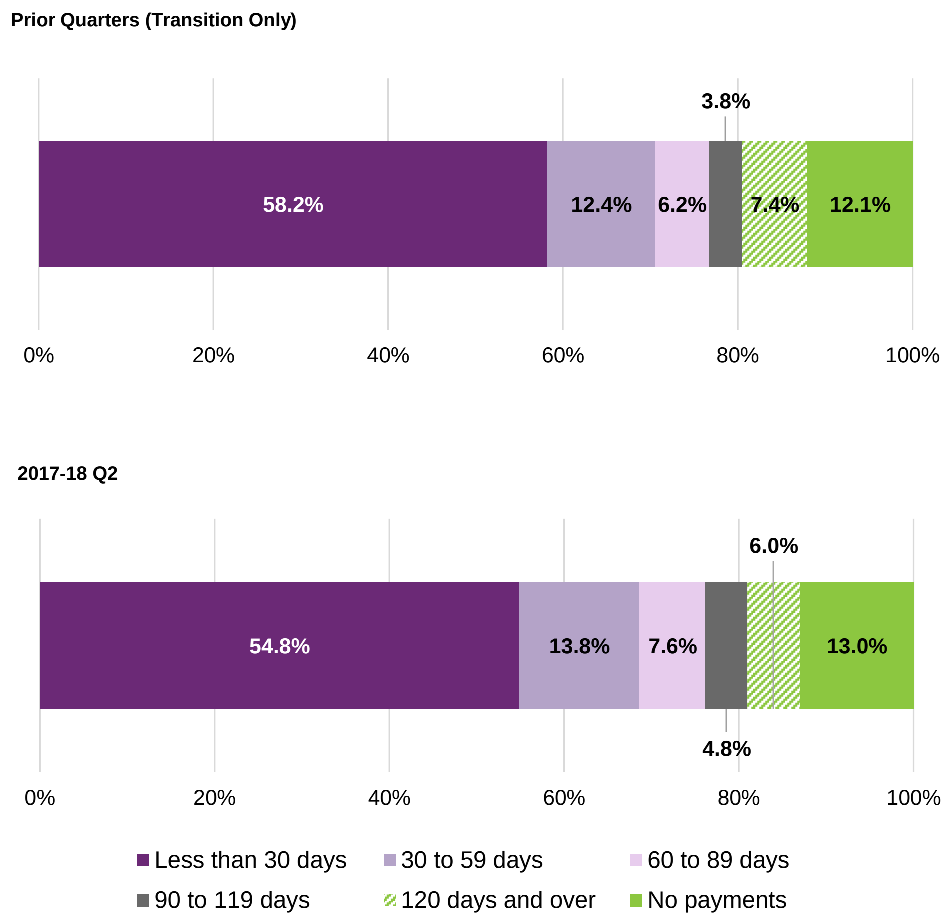
Plan Activation

Plan activation refers to the amount of time between plan approval and the commencement of the participant receiving support.

The percentage of plans activated within 90 days of approval were:
- **77% of plans approved in prior quarters**
- **76% of plans approved in 2017-18 Q2.**

Plan activation can only be approximated using data on payments. As there is a lag between when support is provided and payments made, these statistics are likely to be conservative. That is, it is likely that plan activation is faster than presented. Further, in-kind supports have been excluded from the calculation, which further contributes to the conservative figures.

Duration to Plan activation for initial plans



Note: Given that plans approved after the end of 2017-18 Q2 are relatively new, it is too early to examine the duration to plan activation for these plans and hence these have been excluded from the charts.

Participant Outcomes

Baseline outcome measures were collected from 99% of participants receiving their initial plan since 1 July 2016.

- **70% of participants aged 0 to before school are able to make friends outside of family/carers, compared to 64% of participants from school age to 14**
