The percentage of plans activated within 90 days of approval were:

- 52% of plans approved in prior quarters
- 66% of plans approved in 2017-18 Q1.

Plan activation can only be approximated using data on payments. As there is a lag between when support is provided and payments made, these statistics are likely to be conservative. That is, it is likely that plan activation is faster than presented. Further, in-kind supports have been excluded from the calculation, which further contributes to the conservative figures.

Duration to Plan activation for initial plans

Prior Quarters (Transition Only)

2017-18 Q1

Note: Given that plans approved in 2017-18 Q2 are relatively new, it is too early to examine the duration to plan activation for these plans and hence these have been excluded from the charts.
