1. Month-by-month figures from May 2025 onwards showing the number and percentage of NDIS participants known to the NDIA who are subject to 1 to 12-month funding periods (inclusive)
 - a) Month-by-month figures showing the active count of participants on funding periods, and the distribution of participants on funding period plans with 1 to 12-month funding period interval lengths

* Participants have been counted once across each relevant FP Interval where they have at least one funding component of that interval length.

^ The total proportion(%) is greater than 100% as participants can have funding components / budget items with varying funding period intervals. Participants have been counted once across each relevant FP Interval where they have at least one funding component of that interval length.

The following considerations apply to the figures provided in this response:

- Some participants can have funding components / budget items with varying funding period intervals. Participants have been counted once across each relevant FP Interval where they have at least one funding component of that interval length.
- Some participants have varying funding period intervals within a funding component. For this analysis, the funding period interval is set to be the first interval length.

b) Month-by-month figures showing the active count of participants on funding periods and the proportion of total active Scheme participants, split by varying funding period interval lengths

| Month | 1 Month FP Intervals | | 3 Month FP Intervals | | 6 Month FP Intervals | | 12 Month FP Intervals | | Total Funding Periods | |
