

## COAG Disability Reform Council. This is the Quarterly Performance Report for Australian Capital Territory.

This is the September 2017 update on NDIA performance.

### Overview

Page: 2

This report is the fifth quarterly report during the NDIS Transition period, which commenced on 1 July 2016.

A diagram displays the six key parts which will be discussed in the Performance Report. These areas are:

- Participants and Planning,
- Committed Supports and Payments,
- Providers and Markets,
- Information, Linkages and Capacity Building,
- Mainstream Interface; and
- Financial Sustainability.

### Summary

Page: 3

The following are the key statistics discussed in this report:

#### Participants and Planning

As at 30 September 2017, there were 6,301 participants with approved plans.

As at 30 September 2017, plans approved represent 124% of scheme to date bilateral estimate met (1 July 2014 to 30 September 2017).

#### Committed Supports and Payments

\$667.3 million of supports has been committed to 6,301 participants. This includes \$443.0 million of supports in respect of prior financial years including trial, \$212.8 million of supports in respect of 2017-18 and \$11.4 million of supports in respect of later years.

\$367.9 million has been paid to providers and participants.

Overall, 79% of committed supports were utilised in 2014-15, 84% in 2015-16. Currently utilisation is 68% in 2016-17, although this will likely increase as there is a lag between when support is provided and when it is paid.

#### Providers and Markets

942 approved providers, a 16% increase during the quarter.

80-90% of payments made by the NDIA are received by 25% of providers.

24% of services providers are individual/sole traders.

## Mainstream Interface

85% of active participants with a plan approved in 2017-18 Q1 access mainstream services.

The proportion of participants entering in the current quarter accessing mainstream services is higher compared to prior quarters.

## PART 1: Participants and Planning

Page: 4

As the transition phase to full scheme continues, the NDIS in Australian Capital Territory continues to grow with 253 additional participants with approved plans this quarter.

### Participants and Planning

Page: 5

The NDIS is transitioning to full-scheme in line with phasing schedules bilaterally agreed by State/Territory and Commonwealth governments.

The following are the key statistics on Participants and Planning:

230 access decisions in 2017-18 Q1

253 initial plans approved in 2017-18 Q1

124% of scheme to date bilateral estimate met (1 July 2014 to 30 September 2017)

26% of participants with an initial plan approved in 2017-18 Q1 are children aged 0-6 years

29% of participants with an initial plan approved in 2017-18 Q1 have a reported primary disability of autism

### Quarterly Intake

Page: 6

There are three charts. The first chart displays the number of participants with access met (Eligible) by Participant Entry point. The second chart displays the number of participants with approved plans by Participant Entry Point. The third chart displays the number of participants with approved plans by Participant Pathway Type.

Of the 115 participants deemed 'eligible' this quarter, 93% were 'new' participants (i.e. had not transitioned from an existing State/Territory or Commonwealth program).

Of the 253 plan approvals this quarter, 92% were 'new' participants (i.e. had not transitioned from an existing State/Territory or Commonwealth program) and 56% entered with a permanent disability.

Overall, since 1 July 2014, there have been 7,752 people with access decisions, and 6,301 participants with an approved plan.

The diagram displays the following key statistics on quarterly intake:

230 access decisions

115 access met

253 plan approvals

### Quarterly Intake Detail

Page: 7

A chart displays the change in plan approvals between the current and previous quarter.

Plan approval numbers have increased from 6,048 at the end of 2016-17 Q4 to 6,301 by the end of 2017-18 Q1, an increase of 253 approvals.

As at 30 September 2017 there were 280 exits bringing the overall number to 6,021.

The ACT has undertaken a review of participants with Early Intervention access type to determine potential to exit, and as a result a high number of children were exited from the Scheme in recent months.

In the quarter of 2017-18 Q1 there were 1,413 plan reviews. This figure relates to all participants who have entered the scheme (including transition).

### Cumulative Position

Page: 8

There are two charts. The first chart displays the comparison between the cumulative plan approvals and the bilateral estimate per quarter. The second chart displays the number of plan approvals by participant referral pathway.

As at the end of 2017-18 Q1, the cumulative total number of participants receiving support was 6,301. In addition, 288 participants were awaiting a plan as at 30 September 2017.

Cumulative position reporting is inclusive of trial participants for the reported period and represents participants who have or have had an approved plan.

The following are the key statistics on the cumulative position:

124% of scheme to date bilateral estimate met (1 July 2014 to 30 September 2017)

6,301 plan approvals to date

### Participant Profiles

Page: 9

There are two charts. The first chart displays the number of participants with an approved plan by age group for the current quarter. The second chart displays the percentage of participants with an approved plan by the participant's age group. This chart compares the current quarter against all prior quarters.

Around 26% of participants entering in this quarter are aged 0 to 6 years. This is higher compared to prior quarters.

### Participant Profiles

Page: 10

There are two charts. The first chart displays the number of participants with an approved plan by disability group for the current quarter. The second chart displays the percentage of participants

with an approved plan by the participant's disability group. This chart compares the current quarter against all prior quarters.

29% of participants entering in the quarter of 2017-18 Q1 have a primary disability group of Autism.

### Participant Profiles

Page: 11

A chart displays the percentage of participants with an approved plan by the participant's level of function. This chart compares the current quarter against all prior quarters.

For participants with a plan approval in the current period:

- 51% of active participants had a relatively high level of function
- 36% of active participants had a relatively moderate level of function
- 13% had a relatively low level of function

These relativities are within the NDIS participant population, and not comparable to the general population.

### Participant Profiles

Page: 12

The figure on the right displays the amount and percentage of participants with an approved plan per the participant's gender group. This figure compares the current quarter against all prior quarters. The majority of participants are males.

A chart displays the percentage of participants with an approved plan by Aboriginal and Torres Strait Islanders group. This chart compares the current quarter against all prior quarters. The demographical group with the highest amount of participants are the Not Aboriginal and Torres Strait Islanders group. The following are the key statistics for the current quarter on Aboriginal & Torres-Strait Islander Status

6 Aboriginal and Torres Strait Islander

243 Not Aboriginal and Torres Strait Islander

4 Not Stated

A chart displays the percentage of participants by Young People in residential Aged Care Status. This chart compares the current quarter against all prior quarters. The majority of active participants are the Young People not in Residential Age Care group. The following are the key statistics for the current quarter on Young people in residential aged care status

1 Young people in residential aged care

252 Young people not in residential aged care

### Plan Management Support Co-ordination

Page: 13

Two charts displays the proportion of support coordination and plan management for participants. These charts compare the current quarter against all prior quarters. The majority of plans are fully managed by an agency.

The proportion of participants who are fully or partly self-managing their plan was lower in 2017-18 Q1 (32%) compared with the prior quarters of 2016-17 (39%), and 21% of participants who have had a plan approved in 2017-18 Q1 have support coordination in their plan, compared with prior 74% in prior quarters of 2016-17.

## Plan Activation

Page: 14

The charts display the proportion of the duration to activate plans for the preceding four quarters.

Plan activation refers to the amount of time between plan approval and the commencement of the participant receiving support.

The percentage of plans activated within 90 days of approval were:

- 74% of plans approved in 2016-17 Q1
- 76% of plans approved in 2016-17 Q2
- 64% of plans approved in 2016-17 Q3
- 78% of plans approved in 2016-17 Q4

Plan activation can only be approximated using data on payments. As there is a lag between when support is provided and payments made, these statistics are likely to be conservative. That is, it is likely that plan activation is faster than presented. Further, in-kind supports have been excluded from the calculation, which further contributes to the conservative figures.

Note: Given that plans approved in 2017-18 Quarter 1 are relatively new, it would be too early to examine the duration to plan activation for these plans and hence these have been excluded from the charts.

## Participant Outcomes

Page: 15

A table summarises the number of questionnaires for the key indicators for each of the seven Short Form Outcomes Framework (referred herein as SFOF).

Baseline outcome measures were collected from 84% of participants receiving their initial plan since 1 July 2016.

Of participants aged 25 and over:

- 67% choose who supports them
- 70% want more choice and control in their life
- 71% are happy with their home and feel safe or very safe there
- 37% were actively involved in a community group in the past year

For family/carers of children aged 0 to 14:

- 54% have a paid job
- 53% say they are able to work as much as they want

- 53% say they are able to see family and friends as much as they want

### Participant Outcomes

Page: 16

A chart displays the percentage of participants by selected baseline indicators.

Key measures on baseline social, economic and independence outcomes. These will be monitored into the future.

Participants aged 0 to before school:

- 71% were able to make friends outside of family/carers
- 64% involved in age appropriate community, cultural or religious activities (highest compared with other age groups)

Participants aged 25 and over:

- 31% had a paid job
- 78% choose what they do every day

### Participant Outcomes

Page: 17

A chart displays the responses to the question: 'Has the NDIS helped?' split into age categories and life domains.

Participants who entered the Scheme in 2016-17 Q1 and had their plan reviewed in 2017-18 Q1 were asked questions about whether the NDIS had helped them.

Percentage of participants responding Yes were:

- Higher for 0 to school age participants, particularly for daily living (98%)
- Lower for the school to 14 age group
- Higher for older adult age group than for the younger adult age group

### Participant Satisfaction

Page: 18

A chart displays the participant's satisfaction with the planning process rated as 'good' or 'very good' by quarter.

Due to low number of participant survey responses in 2017-18 Q1, participant satisfaction is not shown for this quarter.

The Participant Pathway Review aims to improve the participant experience.

Participant satisfaction continues to be high, but has dropped during transition, compared with trial site experience.

## PART 2: Committed Supports and Payments

Page: 19

Both committed and paid supports to participants are increasing in line with the growing scheme.

To date funding committed to participants with an approved plan amounts to \$667.3 million (including support periods in the future), of which \$367.9 million has been paid.

The \$667.3 million committed support includes \$443.0 million of supports in respect of prior financial years including trial, \$212.8 million of supports in respect of 2017-18 and \$11.4 million of supports in respect of later years.

Note: The \$212.8 million in respect of 2017-18 only includes approved plans to date, and not all of these plans cover the full 2017-18 year.

Note: The \$11.4 million committed in future years is due to current plans in place that have an end date past 30 June 2018.

### Committed Supports and Payments

Page: 20

This section presents information on the amount committed in plans and payments to service providers and participants.

The following are the key statistics on Committed Supports and Payments:

\$667.3 million of supports has been committed to 6,301 participants

\$443.0 million of supports in respect of prior financial years including trial

\$212.8 million of supports in respect of 2017-18

\$11.4 million of supports in respect of later years

\$367.9 million has been paid to providers & participants

Overall, 79% of committed supports were utilised in 2014-15 and 84% in 2015-16. Currently utilisation is 68% in 2016-17, although this will likely increase as there is a lag between when support is provided and when it is paid.

The 2016-17 and 2017-18 experience is still emerging

Note: The \$212.8 million in respect of 2017-18 only includes approved plans to date, and not all of these plans cover the full 2017-18 year.

Note: The \$11.4 million committed in future years is due to current plans in place that have an end date past 30 June 2018.

### Committed Supports and Payments

Page: 21

A table and a graph shows the comparison between the total committed supports and paid support for each year since scheme inception.

Committed amount by year that the support is expected to be provided, compared with committed supports that have been used (paid).

Of the \$667.3 million that has been committed in participant plans, \$367.9 million has been paid to date.

In particular, for supports provided in:

2014-15: \$21.1m has been paid

2015-16: \$115.1m has been paid

2016-17: \$189.4m has been paid

2017-18 to date: \$42.3m has been paid

### Committed Supports and Payments

Page: 22

Two charts (including and excluding SSA) show the comparison of the distribution of average annualised committed supports by cost band for the current and previous quarter.

A higher proportion of initial plan approvals in 2017-18 Q1 have average annualised committed supports lower than \$20,000 compared with participants who entered in prior quarters when participants with shared supported accommodation (SSA) supports are included.

This is also the case when SSA participants are excluded.

The lower committed support this quarter is likely due to the high number of new participants who entered in the quarter, compared with existing Territory high-cost participants who phased in previously.

### Committed Supports and Payments

Page: 23

A graph shows the comparison between the average annualised committed supports by age band for the current and previous quarter.

Average annualised committed supports increase steeply to age 25, stabilises to age 55 and then reduces at older ages.

All age bands with an initial plan approval in 2017-18 Q1 had lower average annualised committed supports when compared to participants who entered in prior quarters, due to the high number of new participants who entered compared with participants phased in from existing Territory programs.

Note 1: Average annualised committed supports are not shown if there are insufficient data in the group

### Committed Supports and Payments

Page: 24

A graph shows the comparison between the average annualised committed supports by primary disability group for the current and previous quarter.

Participants with Spinal Cord Injury, Cerebral Palsy and Acquired Brain Injury have the highest average annualised committed supports while participants with Developmental Delay, Other Sensory/Speech and Hearing Impairment have the lowest average annualised committed supports.

Participants with an initial plan approval in 2017-18 Q1 had lower average annualised committed supports across a range of disability types when compared with participants who entered in prior quarters.

Note 1: Average annualised committed supports are not shown if there are insufficient data in the group

### Committed Supports and Payments

Page: 25

A graph shows the comparison between the average annualised committed supports by level of function for the current and previous quarter.

The average annualised committed supports generally increase for participants with a lower level of function.

The average annualised committed supports for participants with an initial plan approval in 2017-18 Q1 is lower compared with participants who entered in prior quarters for participants across low, medium and high levels of function.

Note 1: Average annualised committed supports are not shown if there are insufficient data in the group.

Note 2: High, medium and low function is relative within the NDIS population and not comparable to the general population.

### Committed Supports and Payments

Page: 26

A graph shows the comparison between the utilisation of committed supports by the year that the support was expected to be provided.

Utilisation of committed supports by year that the support was expected to be provided as at 30 June 2017, compared with 30 September 2017.

As there is a lag between when support is provided and when it is paid, the utilisation in 2016-17 and 2017-18 will increase, the latter significantly so. Utilisation for 2016-17 and 2017-18 is emerging at lower levels than in 2014-15 and 2015-16.

The utilisation of committed supports has increased for supports provided in 2016-17. This is due to payments in 2017-18 Q1 for supports which were provided during 2016-17.

## PART 3: Providers and Markets

Page: 27

The scale and extent of the market continues to grow, with a 16% increase in the number of providers during the quarter to 942.

### Providers and Markets

Page: 28

This section contains information on registered service providers and the market, with key provider and market indicators presented.

## Provider registration

- To provide supports to NDIS participants, a service provider is required to register and be approved by the NDIA.
- Providers register with the NDIA by submitting a registration request, indicating the types of support (registration groups) they are accredited to provide.
- Providers are approved to deliver disability supports and services to participants of the NDIS if they have at least one registration group approved.

## How providers interact with participants

- NDIS participants have the flexibility to choose the providers who support them.
- Providers are paid for disability supports and services provided to the participants.

The following are the key statistics:

942 approved providers

80-90% of payments made by the NDIA are received by 25% of providers

24% of service providers are individual/sole traders

Assistance products for personal care and safety has the highest number of approved service providers, followed by personal mobility equipment and therapeutic supports

## Providers and Markets

Page: 29

There are two charts. The first chart displays the number of approved services providers over a time period (since December 2016). The second chart displays the type of service provider split into individuals/sole traders and company/organizations over a time period (since December 2016).

As at 30 September 2017, there were 942 registered service providers of which 224 were individual/sole trader operated business while the remaining 718 providers were registered as a company or organisation.

The number of approved service providers increased by 16% from 814 to 942 in the quarter.

24% of approved service providers are individual/sole traders.

The following are the key statistics:

1.16 average number of providers per participant

## Providers and Markets

Page: 30

The figure displays the proportion of active, not yet active and inactive providers.

Change in the activity status of providers.

As at 30 September 2017, 55% of providers were active in the last quarter, 39% were yet to have evidence of activity and 6% were inactive. Of the overall stock of providers, 151 providers began delivering new supports in the quarter.

## Registration Groups

Page: 31

A chart displays the approved providers by the changes in registration group and percentage over the quarter.

The increase in approved providers from 30 June 2017 to 30 September 2017 varies by registration group.

Assistance products for personal care and safety has the highest number of approved service providers and has seen a 22% increase since the previous quarter.

The largest percentage increase in approved providers was for the Assistance with Animals registration group in the quarter. This was followed by Specialised Disability Accommodation, Innovative Community Participation and Interpreting and translation.

## Market share of top providers

Page: 32

An object displays the market share of the top 25% of providers by registration Group.

25% of service providers received 80-90% of the dollars paid for major registration groups.

25% of providers have received 85% of payments during the quarter of 2017-18 Q1 for Assistance with Personal Activities.

The following are the key statistics for the market share of the top 25% of providers by registration category:

85% assistance with personal activities

89% early childhood supports

84% community participation

82% therapeutic supports

80% daily tasks and shared living

## PART 4: Information, Linkages and Capacity Building

Page: 33

Information, Linkages and Capacity Building was covered in the national version of the COAG Quarterly Performance Report.

## PART 5: Mainstream Interface

Page: 34

The proportion of participants entering in the current quarter accessing mainstream services is higher compared to prior quarters.

## Mainstream Interface

Page: 35

An object displays the comparison of the percentage of participants accessing the mainstream supports. The object compares the current quarter against all prior quarters (transition only)

85% of active participants with a plan approved in 2017-18 Q1 access mainstream services, an increase from prior quarters. Participants are accessing mainstream services predominantly for health and wellbeing, lifelong learning and daily activities.

The following are the key statistics:

Main participant profile groups prior quarters (transition only)

Health and wellbeing 39%

Lifelong learning 13%

Daily activities 6%

% of active participants accessing mainstream supports in prior quarters (transition only)

Any mainstream service 80%

Main participant profile groups for the current quarter

Health and wellbeing 46%

Lifelong learning 14%

Daily activities 5%

% of active participants accessing mainstream supports in current quarter

Any mainstream service 85%

## PART 6: Financial Sustainability

Page: 36

Financial Sustainability was covered in the national version of the COAG Quarterly Performance Report.
