Provider quarterly report - school leaver employment

The Provider quarterly report - School leaver employment represents data submitted to the NDIA by school leaver employment support providers.

Providers use the school leaver reporting tool to capture and submit data to the NDIA about the participants they are supporting, the time they spend working on milestones toward employment and the outcomes they achieve.

Read the key highlights and insights in the summary and full reports below:

Outcomes by provider

The Agency publishes the final outcomes reported by providers of employment support for school leavers. The publication of these results highlights the intention of the funding in participant NDIS plans and to enable participants to consider performance when selecting a provider.

Participants can use this information in discussions with providers about what they offer, how they tailor supports to help participants achieve their employment goals and how their results compare to those in the published report.

Lists of 'Outcomes by provider' will be released on a 6 monthly basis showing the final outcomes for participants assisted by individual providers over the preceding 12 months.
