How we work with the community to shape the NDIS

Your voice matters. Help shape the future of the NDIS.

There are several ways to engage with the NDIS. This page brings together opportunities for participants, their families and carers, and community members to take part in co-design and engagement activities. This helps us improve how the NDIS works.

Explore NDIS Engage

NDIS Engage is a platform to help participants, their families, carers and supporters have their say on reforms and improvements to the NDIS. NDIS Engage has information about:

- open engagement and consultation projects
- insights from previous consultations
- updates on co-design groups and priorities.

Visit NDIS Engage to register for topics that matter to you.

How we work with the community to shape the NDIS

The Engagement Framework explains how we work with the disability community to improve the NDIS. It supports co-design and ensures people with lived experience are involved in shaping decisions and services.

It outlines our approach, principles, and what you can expect when we engage.

Read the NDIA Engagement Framework.
