11 April 2019

A new NDIS grant round has been released to establish a national network of specialist providers who will assist the NDIA to support the development of robust support coordination services for NDIS participants with exceptionally complex support needs.

The Exceptionally Complex Support Needs (ECSN) Program, released on the 5th of April 2019, will be delivered by organisations sourced through an open and competitive grant round.

The Program will provide selected organisations with the funding needed to grow and develop the support coordination services for participants with exceptionally complex support needs. This initiative will see a number of highly experienced and skilled providers establishing communities of practice and providing advice to support coordinators in the provision of services to participants.

The open and competitive Exceptionally Complex Support Needs Program grant round is now open and will close at 2pm AEDT/AEST on 1 May 2019.

For further information on the Exceptionally Complex Support Needs Program grants or to apply.
