13 June 2019

It is now quicker and easier to find information about assistive technology (AT) and home modifications (HM).

A new landing page is available and specific pages developed to explain:

- how to provide AT and HM assessments and quotes,
- choosing an AT or HM provider, and
- arranging the repair or replacement of AT.

These are just one of several changes underway to make it easier for NDIS participants, providers and the general community to find and access the information they need about AT and HM. Find out more about AT and HM.
