26 August 2019

New information relating to compensation in the NDIS context is now available.

The Compensation and your plan information is designed to assist participants, their families and carers to understand what information will be requested, and why it is relevant to the NDIS. This section includes details about what effect compensation for personal injury may have to plan funding.

Compensation and your plan information supports the updated Compensation Operational Guideline (OG). The revised OG provides additional clarity on how the NDIA makes decisions about compensation for personal injury. This change allows participants to receive better support and guidance from legal representatives.
