20 February 2020

The NDIA has published a guide to complex home modifications (CHM) for builders and assessors.

The Complex Home Modification Guide is designed to increase knowledge and understanding of complex home modifications to reduce the number of re-quotes and facilitate timely approvals.

The NDIA encourages assessors and builders to use the CHM guide to provide all necessary documentation including a CHM assessment plus a detailed builders quote to avoid delays.

Read more about home modifications and download a copy of the guide.
