24 November 2022

The National Disability Insurance Agency (NDIA) has improved the Explore Data tool with new features, making it easier for you to find the information you need to support NDIS participants, identify new opportunities and understand the NDIS marketplace.

The Explore Data tool provides an easy to use, interactive experience where you can access, customise and view the data you need in the way you prefer.
New features now allow you to sort NDIS data by:

- Participant type (e.g., SIL, Non-SIL)
- Location - including State/Territory, Local Government Area (LGA) and SA2
- Reporting periods - financial quarters over 12-months
- NDIS budget support class and category

Data is grouped into three sections: Participant Data, Market Data and Provider Data, which can be viewed online in your preferred format as a graph, table or downloaded.

The Explore Data tool will be updated each quarter as part of our ongoing commitment to regularly share NDIS data with the public.

If you need help using this tool, you can read the user guide (PDF 663 KB) or email the Scheme Actuary.
