17 July 2023

The National Disability Insurance Agency (NDIA) wants to work with participants and providers to develop new ways of delivering home and living supports.

These new ways of delivering supports will create a better experience and deliver more effective outcomes for participants.

We invite participants, carers and family members, providers and the wider community to share their ideas and proposals on innovative ways to deliver home and living supports.

We aim to provide feedback within 6 weeks.

Details on how to work with us are on our Home and Living Innovation webpage.

Please note there is currently no grant funding available. All ideas and proposals submitted need to use existing NDIS funds and pricing arrangements.

We look forward to hearing from you.
