

New Guides for understanding supports: Supporting your child with assistive technology

13/06/2026, 02:24

15 September 2023

We have released the [Guides for understanding supports: Supporting your child with assistive technology](#) .

Assistive technology (AT) may help children work to their goals. This can help with family relationships, friendships, education, play and household tasks.

The topics covered are:

- [Supporting your child’s communication with assistive technology](#)
- [Supporting your child’s mobility with assistive technology](#)
- [Supporting your child at home and in the community with assistive technology](#)

The Guides detail:

- best practices for early childhood intervention
- assistive technology support options for children
- how to plan the next steps to support a child
- how to choose the right providers.

AT supports may be offered through a child’s NDIS plan or [mainstream and community supports](#) .

Community and mainstream supports are available to everyone, whether or not a child has a disability. The Guides also show where to find more information for families.

[The series of Guides for understanding supports](#) helps people with disability, their families and carers think about what supports suit their needs.

For more information or to provide feedback, please contact gusfeedback@ndis.gov.au.
